

Local municipalities sell beach, transfer station, park and various other vehicle stickers by the millions each year. Despite high volume sales and the vital revenue stream that this creates, available "off the shelf" solutions for Point-of-Sale (POS) software is limited. Bonsai Logic has recognized and addressed this vital gap with StickerTracker™. StickerTracker™ is a fully-featured and customizable Point-of-Sale (POS) solution. Bonsai Logic is ready to start improving your efficiency and saving your municipality money today!

## But don't take our word for it...

### Here's what our customers are saying...

"I have been using Sticker Tracker for a number of years to sell Transfer Station Stickers, Beach Stickers, and Shellfish Permits. It is very user friendly. I have seen this program grow with each passing year. Brian Kasper is a visionary when it comes to developing software that will make one's life much easier. I see this program becoming a truly powerful software that each and every town cannot live without. This past year we were able to implement the ability to catch those who had written bad checks. When we started we had almost four pages (in MS Excel) worth of customers throughout the Town and Schools that had written bad checks; now we have approximately 1 1/2 pages. I see great things happening with Bonsai in the near future."
